Herbert Hilhorst Company: HCLSoftware

Bio

Herbert Hilhorst is an HCL Digital Experience (DX) Technical Advisor at HCLSoftware.

Contact: herbert.hilhorst@hcl-software.com

Introduction

In this hands-on lab, you will explore more advanced topics you may do using the Site Manager. Albert, as a manager, needs to make several updates to the site. The Pharmacy page needs to be reordered and have its description updated to indicate that it is still being built. This will show in the search engine results. In addition, you need to rearrange the page components on the homepage, add an advertising for a new mobile application to download and make this only visible to mobile devices.

In this DX user lab, you will play the role of Albert, a marketing manager.

Albert Dora, Marketing Manager, based in San Francisco (USA)

As Albert, a marketing manager with site manager rights, you will move a page, edit its description, move page components, add a page component that you will complete using a Word document, ensure it is accessible, target it for mobile devices only and test it.

Prerequisites

- 1. Completion of previous HDX-Intro and HDX-BU-100 courses, including the optional labs. In HDX-Intro you get an introduction to Woodburn Healthcare, while in HDX-BU-100 you learn how to use the Site Manager.
- Have a running DX instance. The lab is using the DX Solution Modules in HCL SoFy (<u>https://hclsofy.com/catalog/dx-solution-modules</u>) with its Woodburn Healthcare site. Note that if using your own instance, you will need to adjust the lab steps accordingly.
- Access to download the Lab Resources: In the same place where you have found this lab, you will find corresponding resources which you may download and unzip on your Desktop. This will help you run the lab more easily. You may later replace them with your own.

You will be using the following user IDs and passwords:

Purpose	User	Password
SoFy Login	Your official email id	Your password
SoFy Solution Console Login	sol-admin	<from sofy="" solution=""></from>
DX Login Albert	adora	HCL-Dem0

Lab Overview

In this lab, there are three different parts that let you work with more advanced Site Manager capabilities. These are shortly introduced now.

Part 1: Move Pharmacy Page and Update Page Description

As Albert, a Marketing Manager with Site Manager rights, you will move the Pharmacy page to after Health Resources and update its meta-data for search description to indicate it is still under construction and will be fully available soon.

Part 2: Reorganize the Home Page

Then, you need to swap the Latest Health Resources with the Coverage & Benefits page components on the homepage.

HDX-BU-200 SITE MANAGER LAB

Part 3: Advertise a New Mobile App to Mobile Users using an MS Word Document

And you need to advertise a new mobile application that your users may download. You will use an image and MS Word document to create this. Then you will test if it is accessible, make any corrections, then target this to be visible to mobile users only and test if it works.

Part 1: Move Pharmacy Page and Update Page Description

As Albert, a Marketing Manager with Site Manager rights, you will move the Pharmacy page to after Health Resources and update its meta-data for search description to indicate it is still under construction and will be fully available soon.

1. Go to the home page of Woodburn Healthcare first. On the server where the DX Solution Modules has been installed, next to **Woodburn Healthcare Home Page**, click **Open**.

DX Solution Modu	iles	
Deployed Sandbox Expires	minutes 🛈	HCL Digital Experience Business Solution Examples
Sandbox Links Demo Home Page	Open	HCL Digital Experience Solution Modules
Login ID Password	wpsadmin	HCL Digital Experience (DX) is the fastest way for Practitioners, Developers and IT t Content, Applications, and Processes. It empowers you to create, manage, and deliver to virtually all audiences with responsive content, targeted offers, seamlessly integrate
Woodburn Healthcare Hom	ne Page Open	across channels (web, mobile, hybrid mobile/web applications, and more). It is a web content manager and web portal server combined to provide a platform fo

2. You see that the Pharmacy page now shows before the Health Resources one. You need to reverse them. Log in as Albert, a Marketing Manager. Click **LOG-IN**, enter User ID **adora** and Password **HCL-Dem0** and click **LOG-IN**.

3. Enable the **Edit Mode**. Then open the context menu for **Pharmacy** page. As you have site manager rights, you can easily create and manage content under it, and copy, rename and delete the page. Now move the Pharmacy page to after the Health Resources one, on the same level. Click **Move Page**.

	Published Site 👻 Edit Mode: ON	Show Metadata: ON
Ŧ	- Back to home	
	Site Manager	
	🖹 🖻 🛟 🧚	@
	Woodburn Healthcare

	— G G G G G G G G G G G G G G G G G G G	Create Content
	 □ Find a Doctor ← findadoctor □ □ Coverage & Benefits ← coverageandbene 	Copy Page
	Pharmacy pharmacy	Paste R Move page and select paste as child or sibling to place page
	^{⊞-} 🗎 Health Resources ← healthresources	
	My Account ← myaccount	Open Content Explorer
		Rename Page

 You need to paste it as a sibling, to keep it on the same level. Notice you can also paste it as a child page. Open the context menu for the Health Resources page and click Paste as Sibling.

Site Manager	
■ □ ↓ ↓	0
🚱 Woodburn Healthcare 👻	Create Child Page
 Woodburn Healthcare ← woodburnhealthcare Site Settings ← sitesettings Search Page ← search page 	Create Content
 □ Find a Doctor ← findadoctor □ □ Coverage & Benefits ← coverageandbenefits 	Copy Page Move Page
[™] Pharmacy ← pharmacy [™] Health Resources ← healthresources [™] My Account ← myaccount	Paste Reference to Page Paste as Child Paste as Sibling

5. The Pharmacy page now shows after Health Resources. Next you want to update the page description to ensure search engines will show that this page is in construction as well. While you can easily update the page name and friendly URL using the Rename Page option, the description is managed under the Page Settings. Open the context menu and click **Open Page Settings**.

6. This shows you the general settings. You may have a look at the above tabs for layout, style and vanity URLs. You edit the page description under the page properties. Click the **Edit Page Properties Edit** button.

General	Layout	Style	Vanity URLs	
Stati	armacy us: Published stails Drafts - 0	Updated: today,	5:39 PM - wpsadmin	
Location:	Content Root >	Woodburn He	ealthcare	
Page URL	/wps/myportal	/woodburnheal	thcare/pharmacy	0
Vanity UR	L: None			+
Associate	d content: defa	aultContentPlac	eholder	
Edit Page	Properties			0

7. Under the General tab, you can again manage the page display title, friendly URL and also the description. Notice the other options to manage the cache, security, localization and advanced page settings. You will learn these in advanced courses. Then enter the description The Pharmacy page is under construction and will be fully available soon. and click Save. This will be picked up automatically by the built-in and external search engines and will help users understand that it will be shortly available.

				$\overline{\mathbf{x}}$

* Required Field			Save Canc	el

Congratulations! You have successfully moved the Pharmacy page and added a description that is now going to be picked up by search engines.

Part 2: Reorganize the Home Page

Then, as Albert, you need to swap the Latest Health Resources with the Coverage & Benefits page components on the homepage.

1. Close the secondary navigation for page settings and navigate to the Home page of the Woodburn Healthcare site. Click **Woodburn Healthcare**. Then collapse the site manager to have more space to manage the page.

2. Scroll down to the **Coverage & Benefits Video Campaign** component and move this to the right. Open the portlet menu and click **Move Right**.

3. This puts it below the **Latest Health Resources** component. Move this Latest Health Resources component to the left. In this case, hover over the top of the Latest Health Resources component and notice your mouse icon becomes these four arrows move icon.

NE		A CARACTER AND A CARA
Web Content Viewer (Targeted)	÷	
LATEST HEALTH RESOURCES		_

4. Use this to drag and drop the Latest Health Resources component to the left column. A green box shows to indicate you are moving it to a valid destination.

plate:	Hero - CT	
	Description Hero	
	Hero Banner showing people at a lake	
	Watcont Wewer (Tameter)	LATEST HEALTH RESOURCES

5. It now shows the Latest Health Resources on the left and your Coverage & Benefits on the right.

ition		Center	
[empla	ite:	Hero - CT Homepage Hero	
on:		Hero Banner showing people at a lake	
		THEALTH RESOURCES	COVERAGE & BENEFITS

Congratulations! You have successfully rearranged the components on the homepage using the two ways.

Part 3: Advertise a New Mobile App to Mobile Users using an MS Word Document

Then you need to advertise a new mobile application that your users may download. You will use an image and MS Word document to create this. Then you will test if it is accessible, make any corrections, then target this to be visible to mobile users only and test if it works.

1. Albert wants to advertise the availability of a new mobile application. Ensure Edit Mode is enabled. Navigate to the home page for Woodburn Healthcare and click the **Add a page component and applications** icon.

2. Notice there many out of the box page components for Business Applications, Content, List, integration with HCL Software and more. You may look around. Then open the Content category. Click **Content**.

3. You may have a look at any of them. You can directly see how they will appear on your site. In this case a content that allows you to use and image and some rich text. This can be achieved using the Content Band. Select the **Content Band** and drag & drop it under the current Hero Panel where you see a green placeholder appearing.

4. Then add a nice image to the DAM and use it to grab the attention of your members. Selects the image to change, change the **Digital Asset source** to **HCL DAM** and then click **Select** to open the DAM media picker.

Imago	Digital asset source: HCL DAM - Image:

18. If you Site Manager is still open, close it to have more space to edit.

19. Then check if this content is accessible, so the site may be used by visually impaired people as well. Click the **More** in the menu and then the **Check Accessibility** icon.

20. Notice four issues and start providing a good caption for the table, e.g. **Download from stores** and click **Repair Issue**.

21. Then choose the Header Row to be the table header and click Repair Issue.

22. Add provide alternative texts for the two app store images, **Apple AppStore** for the first and click **Repair Issue**.

23. And Google Play for the Google Play image and click Repair Issue.

-------	----------------------------	---

35. You then see it works nicely on an iPhone. Then try it with a tablet as well. Click **Add Device**, open **Apple iPad** and select **Apple iPad Air**. You may rotate it and even use the QR code to test it also with your own device.

You have successfully added an advertising for a mobile application using an MS Word document that is accessible and only visible for mobile devices and ensured it all work correctly.

Conclusion

Using this lab tutorial, you explored some more advanced functionality of the Site Manager. You learned how to reorganize pages and page components, manage the page description, add page components using an MS Word document you made accessible to publish on your site, target it to mobile devices only and ensure it worked well for all devices.
